QUANTITY SCHEDULE

Sassandra

Channel design screening

The quantities of the works for each design line option, by constraint stretch, made by Open Waterway Designer from the design file. Every number is read from the design's stage results.

Screening — not for construction

Document control

Document number	OWD-SASSANDRA-QS
Revision	A
Date	2026-10-22
Status	Draft
Sensitivity	Public

Revision history

Revision	Date	Status	Description
A	2026-10-22	Draft	Made by Open Waterway Designer.

Data and limits

Data and limits

Reach	unnamed river; from -6.07800, 4.96050 to -6.65500, 5.80200 (longitude, latitude); route 143.964 km; centreline 178.699 km, 1.24 times the route
Coordinate system	WGS 84 / UTM zone 29N
Bank lines	source sentinel2-l2a; seed sentinel2-l2a; moved by the edge fit, at most 30 m (provisional)
Low-confidence width	647 stretches (narrower than 30 m, or flagged by a bank check); threshold provisional
DEM	cop-dem-glo30; SHA-256 b8d216e422d6
Water level	swot-hydrocron; 10th percentile (provisional)
Depth	3.00 m, dry season; depth assumed, not measured
Plan line	centreline
Rule Sets	sizing: pianc-wg141@0.3.0, owd@0.3.0, se_quality C (selected; sizing not run); fits answer: PIANC-B; every Rule unverified
Stale stages	sizing not run, alignment not run, optimise not run, volumes not run

1 Quantities

The design has no design line option, so it has no quantities.
