RUN REPORT

Sassandra

Channel design screening

What ran to make the design's results: the versions, the stages, the inputs and the hashes of the results, for testers and developers. Every number is read from the design's stage results.

Screening — not for construction

Document control

Document number	OWD-SASSANDRA-RR
Revision	A
Date	2026-10-22
Status	Draft
Sensitivity	Public

Revision history

Revision	Date	Status	Description
A	2026-10-22	Draft	Made by Open Waterway Designer.

Data and limits

Data and limits

Reach	unnamed river; from -6.07800, 4.96050 to -6.65500, 5.80200 (longitude, latitude); route 143.964 km; centreline 178.699 km, 1.24 times the route
Coordinate system	WGS 84 / UTM zone 29N
Bank lines	source sentinel2-l2a; seed sentinel2-l2a; moved by the edge fit, at most 30 m (provisional)
Low-confidence width	647 stretches (narrower than 30 m, or flagged by a bank check); threshold provisional
DEM	cop-dem-glo30; SHA-256 b8d216e422d6
Water level	swot-hydrocron; 10th percentile (provisional)
Depth	3.00 m, dry season; depth assumed, not measured
Plan line	centreline
Rule Sets	sizing: pianc-wg141@0.3.0, owd@0.3.0, se_quality C (selected; sizing not run); fits answer: PIANC-B; every Rule unverified
Stale stages	sizing not run, alignment not run, optimise not run, volumes not run

1 Request

Asked for by: `owd report sassandra.owd --kind all --format all -o reports --date 2026-10-22 --json`.

2 Versions

Table 1: The versions that made this result

Part	Version
Open Waterway Designer	0.2.0
Open Report Designer (ord)	0.1.0 (tag v0.1.0)
Open Technical Drawer (otd)	tag v0.4.0
Rules engine (arc-rules)	tag v0.2.4
Design file format_version	"0.4"
Design file engine_version	0.2.0
Rule Set pianc-wg141	0.3.0, SHA-256 0a80012cdf2c7c7e 895868bf01519751 93a81aa045a106aa 4635f32c06fbe8fe
Rule Set owd	0.3.0, SHA-256 f6e4c734b9ac3979 51072c009b813220 96a85f4d357d5963 efe2bd8d18213d4b

3 Stages

Table 2: Each stage: status, the engine that ran it, its dependency hash and its settings

Stage	Status	Engine	Depends on (SHA-256)	Settings
sizing	not run	—	—	{"rule_sets": [{"id": "pianc-wg141", "version": "0.3.0", "hash": "0a80012cdf2c7c7e…", "source": "default"}, {"id": "owd", "version": "0.3.0", "hash": "f6e4c734b9ac3979…", "source": "default"}], "set_inputs": [{"name": "se_quality", "value": "C", "source": "default"}], "vessel_standard_id": null, "draught_m": null}
alignment	not run	—	—	—
optimise	not run	—	—	—
volumes	not run	—	—	—
fits	fresh	0.2.0	482142ac7be29791db3502254386fae654058bb4b05bb393e566a6e2524987f7	{"rule_sets": ["PIANC-B"]}

4 Inputs

The SHA-256 of each input is of its canonical JSON in the design file (sorted keys), as the stages hash it.

Table 3: The inputs and their hashes

Input	Source	SHA-256
left_bank	sentinel2-l2a	98b4e54e7054a2dc 6c34e2ba363330af 4516f4f396421ddd fe5fc1abc7e1df5f
right_bank	sentinel2-l2a	5d07341e578c553f dd4ae7732c8f5d1c 09fd864dc100cac1 d3bda99de1876f46

water_level	swot-hydrocron	3d701ac14d53d8ff 9b3718ad426609f8 da7757611a92cc91 d8fd1a1e2b6abdf4
bed_model	the user's file	548f0979dcae594e 89eba6517f3f66ae 41c8681a7958cb59 0ac8e4cbed4e1112

Table 4: The DEM file

Hash	SHA-256
Recorded in the design	b8d216e422d6719f 47919156c92d4416 00c27272191fd5c0 adfdae0d9a3b0ac2
Of the bytes given	b8d216e422d6719f 47919156c92d4416 00c27272191fd5c0 adfdae0d9a3b0ac2
Result	they match

5 Hashes of the results

Each SHA-256 is printed in four groups of 16 hex digits. The document hash is of its canonical JSON. Each trace hash is of the trace `owd trace --json` prints. Each sheet hash is of the sheet's normalised content, the file `owd draw` writes as `<number>.normalised.json`.

Table 5: The hashes of the results

Result	SHA-256
The design document	a164feb4813540d3 46c636ea6a293865 bea307657e5ed24c 27c416e0d8a996ce
Rule trace, channel and reaches	not rebuilt: the sizing stage has no vessel class: choose one first
Sheets	not drawn: the design has no design line option to draw: run `owd align` first
